KodoTech

# RAGret

## Business Model

Evidence-backed memory for project decisions

Proposed offers, pilot plan, and financial assumptions

Planning proposal for review. Commercial offers and financial inputs remain unvalidated.

# Business Plan

A local entry point, then a paid shared workspace

## Local starter

**PHP 0**

Current local workflow.
Users supply their own
AI provider configuration.

## Team workspace

**PHP 499 / month**

Proposed for up to five
members.
Shared history and receipts
require further development.

## Organization support

**Scoped quote**

Future deployment,
onboarding, and
maintenance
based on assessed effort.

Proposed pricing for validation. Shared workspaces and billing are future work.

# 90-Day Pilot

Five supervised pilot teams before a paid beta

## Days 1-30

**15 interviews**

Recruit five teams with authorized project records. Record baseline tasks.

## Days 31-60

**5 supervised pilots**

Evaluate evidence quality. Target three teams returning weekly near the end.

## Days 61-90

**2 price acceptances**

Test PHP 499 with a defined offer. Review costs and paid-service readiness.

Targets, not achieved results. Paid launch depends on quality, permissions, and isolation.

# Pilot Budget

PHP 24,000 proposed cash allowance for 90 days

**PHP 24,000**

Proposed experiment envelope for KodoTech to review

Funding source to be determined

| | |
|---|---|
| Fixed operations, three months | **PHP 9,000** |
| Evaluation AI usage | **PHP 3,000** |
| Pilot recruitment and onboarding | **PHP 2,000** |
| Security and deployment preparation | **PHP 5,000** |
| Contingency | **PHP 5,000** |

Planning allowances. Excludes salaries, hardware, tax, and paid-team variable service costs.

# Recurring Economics

Illustrative monthly assumptions per paid workspace

**PHP 499**

Monthly workspace price

**PHP 150**

Assumed variable cost

**PHP 349**

Contribution per workspace

**9 paying workspaces**

Modeled recurring break-even
with PHP 3,000 fixed costs per month

At PHP 250 variable cost:
13 workspaces to break even

Scenario, not a sales forecast. Excludes salaries, tax, and nonrecurring pilot costs.
